CONSOLIDATED

CANADA - U.S. TRADE WAR & TARIFF GUIDE

REVISED: 14 SEPTEMBER 2026

A practical business reference covering U.S. Sections 232, 301 and 338, Canadian counter-tariffs, CUSMA, tariff relief and business-support programs.

Includes the current U.S. Section 338 scope effective September 15 and announced import prohibitions effective September 29, 2026.

About this guide

The Huron Chamber of Commerce prepared this guide as a consolidated reference for Huron County businesses navigating the changing Canada-U.S. trade environment. It replaces separate Chamber guides to U.S. Section 338 tariffs and Canada's September 8 counter-tariffs, and adds the other tariff measures, relief programs and business supports needed to understand the broader trade picture.

Current as of September 15, 2026

This guide uses the Section 338 product scope effective September 15, 2026. Separate U.S. import prohibitions on specified Canadian alcoholic beverages, dairy-related products and motorcycles are announced for September 29. Appendix B contains the current September 15 Section 338 list and identifies the products scheduled for prohibition on September 29.

Use this as a navigation tool, not a customs ruling

Tariff treatment depends on product classification, origin, entry date, composition and the specific legal authority being applied. Product descriptions in this guide are shortened for readability. Confirm a specific shipment with a qualified customs broker, trade adviser, CBSA or U.S. Customs and Border Protection before making business decisions.

1. Trade landscape at a glance and timeline

There is no single “Canada-U.S. tariff.” Several measures now operate at the same time, and the applicable treatment can differ substantially depending on the product and its origin. The following table is a starting point only.

How the current tariff landscape developed

The current tariff picture is the result of several measures introduced and revised over a short period. This timeline focuses on the major 2026 changes covered by this guide.

Date	Measure	What changed
Apr. 6, 2026	U.S. Section 232	A major 2026 steel, aluminum and copper framework took effect. Many primary metal products became subject to 50% duties, specified derivatives to 25%, and selected fixed industrial machinery and power equipment to temporary 15% treatment. For many covered products, the duty applies to the full customs value.
Jun. 8, 2026	U.S. Section 232	Further changes took effect, including revised treatment for agricultural equipment, industrial machinery and residential HVAC products. Special treatment was also introduced for certain Canadian and Mexican CUSMA-qualified goods based on non-U.S. content, subject to a minimum 15% effective duty.
Jul. 20, 2026	U.S. Section 338	Three proclamations announced additional 50% duties on specified Canadian goods in response to U.S. complaints concerning alcoholic beverages, dairy and motor vehicles. The original effective date was August 19.
Jul. 24, 2026	U.S. Section 301	A 10% Section 301 tariff took effect on most Canadian goods following U.S. forced-labour investigations, replacing the expired Section 122 surcharge. CUSMA goods qualifying for preferential duty-free treatment remain exempt, and other product exclusions also apply.
Aug. 18, 2026	U.S. Section 338	The United States delayed the effective date of the three Section 338 tariff proclamations by three days, from August 19 to August 22.
Aug. 22, 2026	U.S. Section 338	The 50% Section 338 duties took effect on the listed Canadian products. Unlike Section 301, there is no general CUSMA exemption for covered Section 338 goods.
Aug. 25, 2026	Canadian counter-tariffs	Canada announced a new package of 15%, 25% and 50% counter-tariffs on U.S.-origin goods covering $27.6 billion in imports, effective September 8. Earlier Canadian countermeasures, including automobiles, remained in place.
Aug. 26, 2026	Canadian counter-tariffs	Finance Canada revised the planned September 8 product list before implementation. The current schedule contains 629 tariff items. Fish and seafood lines were removed from the planned list and nine tariff items were added.
Sep. 8, 2026	Canada and U.S. Section 338	Canada’s new counter-tariff package took effect. The same day, the United States announced Section 338 scope modifications for September 15 and separate import prohibitions for September 29.
Sep. 15, 2026	U.S. Section 338	The current revised Section 338 product scope took effect. Salt and Portland cement are among the products no longer on the tariff list, while other HTS provisions were added, narrowed or refined. Appendix B shows only the products covered under the current schedule.
Sep. 29, 2026 (announced)	U.S. Section 338	Specified Canadian alcoholic beverages, certain dairy-related products and motorcycles over 800 cc are scheduled to move from the 50% Section 338 tariff to an import prohibition, subject to the timing rules in the proclamations.

Timeline note: This is a practical summary of major effective and announced changes. It is not a substitute for transaction-specific customs verification, and trade measures may change quickly.

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

Measure	Direction	Core rate	CUSMA treatment	Current status	Detailed appendix
Section 232	Canada → U.S.	10% to 100%, depending on sector	Varies by sector; no blanket exemption	Active; additional announced changes ahead	Appendix A
Section 301	Canada → U.S.	10% on most goods	CUSMA duty-free goods exempt	Active since July 24, 2026	No separate appendix
Section 338	Canada → U.S.	50% on listed products	No CUSMA exemption	Current Sep. 15 scope active; import bans announced for Sep. 29	Appendix B
Canadian counter-tariffs	U.S. → Canada	15%, 25% or 50% on listed goods; other existing measures continue	Origin and measure-specific rules apply	Sep. 8 package active; older countermeasures also continue	Appendix C

Do not add the rates together automatically

Different measures have different rules. However, the September 8 U.S. proclamations state that Section 338 duties, as modified, apply in addition to Section 232 duties where both regimes cover the same product. That makes classification and the applicable effective date especially important under the current September 15 Section 338 scope.

2. U.S. Section 232 sectoral tariffs

Section 232 of the U.S. Trade Expansion Act is the authority used for sector-specific national-security tariffs. For Canadian exporters, it is now a collection of separate regimes rather than a single tariff. CUSMA treatment is category-specific and should never be assumed to eliminate Section 232 exposure.

Sector	Current treatment	CUSMA / special treatment	Key dates
Steel, aluminum and copper, including derivatives	Generally 15% to 50% on full customs value; products below 15% applicable metal by weight are exempt; goods with at least 85% U.S. metal content may receive 10% treatment	Special rules exist for certain Canadian/Mexican CUSMA-qualified goods and U.S. content. Review the applicable annex and calculation method.	Major 2026 framework effective April 6; further changes effective June 8
Autos, trucks and parts	25%	U.S. content in CUSMA-compliant autos/trucks is exempt; CUSMA-compliant parts are not currently subject to the 25% tariff.	Active
Buses	10%	No CUSMA or U.S.-content exemption stated for the bus tariff.	Active
Softwood timber and lumber	10%	No CUSMA exemption.	Active

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

Sector	Current treatment	CUSMA / special treatment	Key dates
Certain upholstered furniture, kitchen cabinets and vanities	25% currently	No CUSMA exemption.	Scheduled Jan. 1, 2027: 30% upholstered furniture; 50% cabinets/vanities
Certain semiconductors	25%	Specified U.S. domestic-use exemptions; no CUSMA exemption.	Active
Patented pharmaceuticals and associated ingredients	100% for covered companies/products	Specified MFN-pricing/onshoring relief for listed companies; generics currently exempt. No CUSMA exemption.	Broader application to unlisted companies scheduled Sep. 29, 2026
Unmanned aircraft systems (UAS)	100% for specified large/thermal UAS, docking stations and critical components; 25% for specified smaller UAS	Country/program exceptions may apply; not a simple CUSMA exemption.	Main tariffs effective Sep. 3, 2026; specified components 25% from Feb. 9, 2027
Polysilicon and derivatives	Minimum import price program, plus 15% tariff on specified ingots and derivatives	Country and onshoring provisions vary.	Scheduled Dec. 4, 2026

The most locally relevant Section 232 issue for many manufacturers is the metals regime. The Chamber's June bulletin noted that agricultural equipment, material-handling equipment, HVAC components, steel racks, fabricated products and machinery assemblies can be affected even when the finished good would not normally be described as "steel," "aluminum" or "copper."

Government of Canada: Current U.S. tariff measures affecting exporters

White House: U.S. Section 232 proclamation

White House: Polysilicon Section 232 proclamation

3. U.S. Section 301 tariffs

On July 24, 2026, the United States imposed a 10% tariff under Section 301 of the Trade Act of 1974 on imports of most goods from Canada and a number of other countries following investigations concerning enforcement of prohibitions on imports produced using forced labour. This replaced the temporary Section 122 tariff structure that expired the same day.

CUSMA matters here

Goods that qualify for preferential duty-free treatment under CUSMA are exempt from the Section 301 tariff. A range of products is also fully excluded from the Section 301 measure. Businesses should confirm CUSMA qualification rather than assuming that Canadian origin alone is enough.

Because Section 301 is a broad measure with CUSMA and product exclusions rather than a targeted Canada-only tariff list like Section 338, this guide does not reproduce a separate product appendix for Section 301.

Government of Canada: Current U.S. tariff measures affecting exporters

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

4. U.S. Section 338 tariffs and September 29 prohibitions

The United States imposed additional 50% Section 338 duties on a broad range of Canadian products on August 22, 2026, following three July proclamations addressing U.S. complaints involving alcoholic beverages, dairy and motor vehicles. Section 338 does not provide an exemption for CUSMA-compliant goods.

Current Section 338 scope, effective September 15

The current Section 338 product scope applies to goods entered for consumption, or withdrawn from warehouse for consumption, at or after 12:01 a.m. Eastern Time on September 15, 2026. The September 8 scope-modification proclamations revised the covered HTS provisions. Appendix B reproduces only the products covered under the current September 15 schedule.

Stacking with Section 232

The September 8 modification proclamations state that the Section 338 duties, as modified, apply in addition to Section 232 duties. A covered product can therefore require analysis under both authorities.

September 29 import prohibitions

Separate September 8 proclamations exclude specified Canadian goods from importation into the United States beginning at 12:01 a.m. Eastern Time on September 29. The bans cover specified alcoholic beverages, specified whey, molasses and non-alcoholic beer products, and motorcycles with engine displacement over 800 cc. For products imported before September 29 but not yet entered for consumption or withdrawn from warehouse, the proclamations provide that the 50% Section 338 duty continues to apply.

Area	September 29 prohibition	Important scope point
Alcohol	Specified beer, wine, cider, sake, spirits and related beverages	For many HTS lines, only “packaged” direct-to-consumption containers are prohibited. Appendix B identifies the scope limitation.
Dairy / food ingredients	Specified whey products, molasses and non-alcoholic beer	The prohibition applies only to the listed HTS provisions.
Motor vehicles	Motorcycles and cycles with reciprocating internal-combustion engines over 800 cc	HTS 8711.50.00.

White House: September 8 Canada tariff fact sheet
White House: Alcohol scope modification effective September 15
White House: Motor-vehicle scope modification effective September 15
White House: Alcohol import prohibitions effective September 29
White House: Dairy-related import prohibitions effective September 29
White House: Motorcycle import prohibition effective September 29

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

5. Canadian counter-tariffs

Canada's countermeasures apply to U.S.-origin imports entering Canada. The September 8, 2026 package responds to the U.S. Section 338 measures and applies 15%, 25% or 50% surtaxes to products covering $27.6 billion in imports from the United States. The current September 8 schedule contains 629 tariff items.

Origin matters

The September 8 surtaxes apply to goods originating in the United States under the applicable country-of-origin marking rules. Buying from a U.S. supplier does not, by itself, establish U.S. origin. U.S. goods already in transit to Canada when the measures took effect are excluded from the September 8 surtax.

The September 8 package is not the whole Canadian response. Earlier counter-tariffs continue to apply, including the Canadian auto countermeasure. In sectors such as steel and aluminum, some previously existing 25% counter-tariffs increased to 50% under the September 8 package. Finance Canada now maintains a consolidated page as the authoritative source for tariff items, effective dates and rates.

Use Appendix C for the current September 8 schedule

Appendix C reproduces the 629 current tariff items in the September 8 counter-tariff package. For all Canadian countermeasures, including older measures, verify current treatment against Finance Canada's complete consolidated list and applicable CBSA notices.

Finance Canada: Complete list of U.S. products subject to counter-tariffs

Finance Canada: September 8 product list and administration details

6. CUSMA and tariff treatment

CUSMA remains central to Canada-U.S. trade, but it does not produce the same result under every tariff authority. Businesses should treat CUSMA qualification as one part of the tariff analysis, not as a universal exemption.

Measure	Effect of CUSMA	Practical implication
Section 301	CUSMA goods qualifying for preferential duty-free treatment are exempt from the 10% Section 301 tariff.	CUSMA certification can materially change the tariff result.
Section 338	No CUSMA exemption.	A CUSMA-originating product can still face the additional 50% Section 338 duty if listed.
Section 232	Treatment varies by sector.	Autos/parts and certain metals have special CUSMA/U.S.-content rules, while buses, lumber, furniture/cabinets, semiconductors and patented pharmaceuticals do not have a blanket CUSMA exemption.
Canadian counter-tariffs	Canadian surtax rules focus on U.S. origin under the applicable marking/origin rules.	Confirm the origin test for the specific Canadian measure.

Government of Canada: CUSMA information and guidance

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

7. Tariff relief and duty recovery

Tariff exposure should be reviewed together with available relief mechanisms. Relief is transaction-specific, and eligibility, documentation and timing requirements matter.

Mechanism	What it does	When to look at it
Tariff remission	The federal government can remit tariffs in exceptional circumstances. Businesses not covered by prior temporary remission orders may submit an individual remission request to Finance Canada.	When tariffs create exceptional hardship, inputs are unavailable domestically, or another strong policy case exists.
Duties Relief Program	Allows eligible importers to defer duties on imported goods that will later be exported, either in the same condition or after processing.	When imported inputs are used in goods that will be exported.
Duty Drawback Program	Allows eligible businesses to recover certain duties already paid on imported goods that are subsequently exported.	When duties have already been paid and qualifying goods or products are exported.
Customs classification / origin review	A classification or origin error can create tariff exposure that should not exist.	Before pursuing relief, confirm the tariff item, origin, valuation and entry treatment.

Finance Canada: Process for requesting remission of tariffs on certain U.S. goods

CBSA: Duties Relief and Duty Drawback programs

8. Financing and business support

Federal and Ontario support has expanded as the trade dispute has escalated. The programs below are the most relevant broad-based supports for Huron County businesses as of September 15, 2026. Program rules can change, so confirm eligibility before relying on any amount or term.

Program	Who / purpose	Current support	Key notes
BDC Pivot to Grow	Tariff-affected Canadian businesses needing liquidity	Loans $250,000 to $5 million; 0% interest first 12 months; interest-only payments over 36 months; amortization over 96 months	Expanded Aug. 25; minimum revenue requirement lowered to $1 million.
EDC Trade Impact Program	Exporters managing tariff, trade and market risk	$700 million direct-financing envelope with flexible terms, alongside broader financing and insurance support	Expanded terms effective Sept. 1; part of EDC's larger tariff-response capacity.
FedDev Ontario Regional Tariff Response Initiative	Incorporated tariff-affected businesses in southern Ontario with at least $1 million annual revenue, plus eligible business-support organizations	Liquidity: up to $2 million non-repayable, generally up to 50% of eligible costs; pivot projects: up to $1 million non-repayable or larger repayable contributions; up to $3 million combined non-repayable; up to $20 million total where repayable support is included	Enhanced intake opened Sept. 8. Liquidity can cover up to 12 months; project funding supports productivity, competitiveness and diversification.
Canada Strong Diversification Fund	Larger businesses directly or indirectly affected by Section 338	Funding requests $5 million to $30 million for medium-term relief up to two years	Applicant criteria include at least $20 million annual revenue and average annual CAPEX of at least $5 million over the last three fiscal years.

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

Program	Who / purpose	Current support	Key notes
Protect Ontario Financing Program	Ontario for-profit businesses in eligible tariff-impacted sectors	Term-loan financing; program evaluates material working-capital challenges and other criteria	Baseline eligibility includes at least $2 million annual revenue and 10 full-time Ontario employees. Ontario expanded eligibility for the new Sept. 15 and Sept. 29 affected products.
Ontario Together Trade Fund	Ontario SMEs making near-term investments to diversify markets, strengthen resilience and reshore supply chains	Project-based provincial support	Ontario announced expanded eligibility for products affected by the Sept. 15 tariffs and Sept. 29 import prohibitions.

BDC: Expanded Pivot to Grow liquidity stream

EDC: Expanded Trade Impact Program

FedDev Ontario: Regional Tariff Response Initiative in southern Ontario

ISED: Canada Strong Diversification Fund

Ontario: Protect Ontario Financing Program eligibility

Ontario: September 10 expansion of tariff-support eligibility

9. Trade, workforce and diversification resources

Financial support is only one part of the response. Businesses should also use customs, export-market, workforce and data resources to reduce risk and find alternatives.

Trade Commissioner Service: CUSMA compliance guidance, market diversification, tariff tools and trade commissioners. Open resource

Canada Tariff Finder: Tariff information by product and market, useful as an initial screening tool. Open resource

CBSA Customs Notices: Administrative guidance for Canadian surtaxes, remission and customs implementation. Open resource

Finance Canada complete counter-tariff list: Authoritative consolidated list for Canadian counter-tariff items, effective dates and rates. Open resource

Huron Chamber Trade & Tariffs Hub: Current Chamber updates, guides, local research, support links and trade resources. Open resource

Workforce measures can also be relevant when tariff impacts affect hours or staffing. Employers should review EI Work-Sharing and other federal or provincial worker-support measures where reduced activity is expected, and confirm current program conditions through official government sources.

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

10. Huron County business context and practical checklist

Local exposure extends beyond direct exporters

The Huron Chamber's August tariff-impact survey found that 47% of respondents exported directly to the United States, but 65% purchased goods, materials or components from the United States and 65% believed their customers could be affected. Fifty-nine per cent identified pricing changes as a potential effect, 53% anticipated reduced sales or orders, 47% identified higher costs and 41% identified supply-chain disruption. Just over half, 53%, described the potential business impact as moderate or significant.

Those results reinforce why a local tariff review should consider inputs, suppliers, customers and investment decisions, not only goods physically crossing the border under the company's own name.

Practical tariff review checklist

- Identify the HS/HTS classification for every product, material and component that may cross the border.
- Confirm country of origin under the rule that applies to the specific tariff measure. Do not equate supplier location with origin.
- Check CUSMA qualification and maintain the records needed to support the claim.
- Review Section 232, Section 301 and Section 338 separately for U.S.-bound goods. Confirm whether Section 338 and Section 232 both apply under the current September 15 scope.
- For Canadian imports, check Finance Canada's consolidated counter-tariff list and CBSA notices.
- For goods affected by the September 29 Section 338 prohibitions, review shipment and entry timing immediately with the U.S. importer and customs broker.
- Review contracts and Incoterms to determine who bears tariff, customs, documentation and delay risk.
- Ask whether remission, duties relief, drawback or financing support can reduce the impact.
- Document assumptions and re-check them before major sourcing, pricing, contract or investment decisions because the measures can change quickly.

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

Appendix A. Section 232 detailed sector reference

Section 232 is a set of sector-specific regimes. Unlike Appendix B and Appendix C, there is no single compact Canada-only tariff schedule that can be reproduced accurately as one table. This appendix therefore summarizes each active or announced regime, the principal rates and the treatment most relevant to Canadian businesses. The controlling U.S. proclamations, annexes and HTSUS provisions remain authoritative.

Sector	Rate / mechanism	Effective status	CUSMA / content rules	Important detail	Primary verification source
Steel, aluminum, copper and derivatives	15% to 50% on full value; 10% reduced treatment for qualifying high U.S.-metal content	Active; 2026 framework modified June 8	No blanket CUSMA exemption. Certain listed Canadian/Mexican CUSMA goods have special non-U.S.-content calculation rules; treatment depends on annex.	Less than 15% applicable metal by weight is exempt under the current framework; 85% U.S. metal threshold can matter.	TCS current tariff page; applicable White House annexes
Autos, trucks and parts	25%	Active	U.S. content in CUSMA autos/trucks exempt; CUSMA parts not currently subject.	Confirm vehicle/part classification and U.S. content.	TCS current tariff page
Buses	10%	Active	No CUSMA or U.S.-content exemption.	Sector-specific coverage.	TCS current tariff page
Softwood timber and lumber	10%	Active	No CUSMA exemption.	Separate from anti-dumping/countervailing duty issues that may also exist.	TCS current tariff page
Upholstered furniture; kitchen cabinets and vanities	25%	Active; scheduled increase Jan. 1, 2027	No CUSMA exemption.	Scheduled: 30% certain upholstered furniture; 50% cabinets/vanities.	TCS current tariff page
Certain semiconductors and derivatives	25%	Active	No CUSMA exemption; specified domestic-use exemptions.	Coverage is limited to specified products and uses.	TCS current tariff page
Patented pharmaceuticals and associated ingredients	100%	Current for covered Annex III companies; broader application scheduled Sep. 29, 2026	No CUSMA exemption.	Listed companies with qualifying MFN/onshoring arrangements have temporary exemption through Jan. 20, 2029; generics currently exempt.	TCS current tariff page; U.S. pharmaceutical proclamation

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

Sector	Rate / mechanism	Effective status	CUSMA / content rules	Important detail	Primary verification source
Unmanned aircraft systems	100% or 25%; selected components 25%	Main UAS tariffs active Sep. 3, 2026; component tariff scheduled Feb. 9, 2027	Country/program exceptions vary.	100% applies to specified larger/thermal UAS, docking stations and critical components; 25% to specified smaller UAS.	White House UAS proclamation
Polysilicon and derivatives	Minimum import price program plus 15% on specified ingots/derivatives	Scheduled Dec. 4, 2026	Country/onshoring provisions vary.	MIP: US$21/kg raw polysilicon; $100/kg ingots/wafers; $0.22/W cells; $0.38/W modules.	White House polysilicon proclamation

Section 232 metals: Chamber June 2026 note

The Chamber's Section 232 member bulletin highlighted a June 8 adjustment affecting steel, aluminum and copper articles and derivatives. It advised manufacturers to review products by HTS code, document U.S.-produced parts and metal-origin content, and not assume CUSMA qualification removes the tariff. For certain listed Canadian/Mexican CUSMA-qualified goods, the bulletin noted a 25% duty calculation on non-U.S. content, subject to a 15% minimum effective duty, while the separate 85% U.S.-metal threshold may affect treatment under the wider framework.

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

Appendix B. Section 338 detailed HTS reference

Appendix B reproduces the Section 338 product schedule effective September 15, 2026, using the applicable U.S. HTS provisions and indicative descriptions as navigation aids. Products scheduled to become prohibited imports on September 29 remain in the current list through September 28 and are identified by their upcoming treatment. The White House proclamations, annexes and HTSUS control.

Current Section 338 reference

The tables below show the Section 338 schedule effective September 15. Where a row states “50% through Sep. 28; prohibited Sep. 29,” the 50% duty remains the current treatment through September 28, followed by the announced import prohibition, subject to the proclamation’s timing rules.

B1. September 29 import prohibitions

The following products move from the 50% tariff to an import prohibition on September 29, 2026. For alcohol rows marked “Packaged,” the White House annex limits the prohibition to products packaged in bottles, cans, boxes, kegs or similar direct-to-consumption containers.

HTS code	Indicative description	Scope limitation	Treatment from Sep. 29
0404.10.05	Whey protein concentrates	Entire listed HTS provision	Import prohibited
0404.10.08	Modified whey (except protein concentrates), subject to General Note 15 of the HTSUS	Entire listed HTS provision	Import prohibited
0404.10.11	Modified whey (except protein concentrates), whether or not concentrated or sweetened, subject to additional U.S. note 10 to chapter 4 of the HTSUS	Entire listed HTS provision	Import prohibited
0404.10.15	Modified whey (except protein concentrates), whether or not concentrated or sweetened, not subject to General Note 15 of the HTSUS	Entire listed HTS provision	Import prohibited
0404.10.20	Fluid whey, whether or not concentrated or containing added sweeteners	Entire listed HTS provision	Import prohibited
0404.10.48	Whey (except modified whey), dried, whether or not concentrated or sweetened, subject to General Note 15 of the HTSUS	Entire listed HTS provision	Import prohibited
0404.10.50	Whey (except modified whey), dried, whether or not concentrated or sweetened, subject to additional U.S. note 12 to chapter 4 of the HTSUS	Entire listed HTS provision	Import prohibited
0404.10.90	Whey (except modified whey), dried, whether or not concentrated or sweetened, not subject to General Note 15 or additional U.S. note 12 to chapter 4 of the HTSUS	Entire listed HTS provision	Import prohibited
1702.90.35	Invert molasses	Entire listed HTS provision	Import prohibited
1703.10.30	Cane molasses imported for the commercial extraction of sugar or human consumption	Entire listed HTS provision	Import prohibited
1703.10.50	Cane molasses, nesoi	Entire listed HTS provision	Import prohibited

Convenience reference only. Accuracy and completeness are not guaranteed. Not legal, customs or trade advice. Confirm classifications and tariff treatment with a qualified customs broker or the appropriate customs agency before making business decisions.

HTS code	Indicative description	Scope limitation	Treatment from Sep. 29
1703.90.30	Molasses, other than cane, imported for the commercial extraction of sugar or human consumption	Entire listed HTS provision	Import prohibited
1703.90.50	Molasses, nesoi	Entire listed HTS provision	Import prohibited
2202.91.00	Non-alcoholic beer	Entire listed HTS provision	Import prohibited
2203.00.00	Beer made from malt	Packaged only	Import prohibited
2204.10.00	Sparkling wine, made from grapes	Packaged only	Import prohibited
2204.21.20	Effervescent grape wine, in containers holding 2 liters or less	Entire listed HTS provision	Import prohibited
2204.21.30	Tokay wine (not carbonated), not over 14% alcohol, in containers not over 2 liters	Entire listed HTS provision	Import prohibited
2204.21.50	Wine other than Tokay (not carbonated), of an alcoholic strength by volume not over 14%, in containers not over 2 liters	Entire listed HTS provision	Import prohibited
2204.21.60	Marsala wine, of an alcoholic strength by volume over 14%, in containers holding 2 liters or less	Entire listed HTS provision	Import prohibited
2204.21.80	Grape wine, other than Marsala, not sparkling or effervescent, of an alcoholic strength by volume over 14%, in containers holding 2 liters or less	Entire listed HTS provision	Import prohibited
2204.22.20	Wine of fresh grapes, other than sparkling wine, of an alcoholic strength by volume not over 14%, in containers holding over 2 liters but not over 4 liters	Entire listed HTS provision	Import prohibited
2204.22.40	Wine of fresh grapes, other than sparkling wine, of an alcoholic strength by volume over 14%, in containers holding over 2 liters but not over 4 liters	Entire listed HTS provision	Import prohibited

Appendix C. Canadian counter-tariff detailed HS reference

This appendix reproduces the 629 current tariff items in the September 8 Canadian counter-tariff package, using the Chamber's August 31 updated reference as the working source. Finance Canada's consolidated counter-tariff page remains the authoritative source for current tariff items, effective dates and rates, including Canadian measures that predate September 8.

How to use this appendix

Search by tariff item or product term, then confirm the classification, U.S. origin and applicable surtax with a qualified customs broker or CBSA. The HS headings and indicative descriptions below are navigation aids and do not change the legal classification.

Dairy, cheese, honey and food ingredients (66 tariff items)

Tariff item	HS heading	Indicative description	Rate
0402.10.10	Milk and cream, concentrated or sweetened.	Powder/granules/solids <=1.5% fat: Within access commitment	50%
0402.10.20	Milk and cream, concentrated or sweetened.	Powder/granules/solids <=1.5% fat: Over access commitment	50%
0402.21.11	Milk and cream, concentrated or sweetened.	Milk >1.5% fat, unsweetened: Within access commitment	50%
0402.21.12	Milk and cream, concentrated or sweetened.	Milk >1.5% fat, unsweetened: Over access commitment	50%
0402.21.21	Milk and cream, concentrated or sweetened.	Cream >1.5% fat, unsweetened: Within access commitment	50%
0402.21.22	Milk and cream, concentrated or sweetened.	Cream >1.5% fat, unsweetened: Over access commitment	50%
0402.91.10	Milk and cream, concentrated or sweetened.	Other unsweetened: Within access commitment	50%
0402.91.20	Milk and cream, concentrated or sweetened.	Other unsweetened: Over access commitment	50%
